

SIGNAL LINE, FENCE AND METHOD FOR MANUFACTURING A FENCE**ABSTRACT OF THE DISCLOSURE**

The invention relates to a signal line comprising a conductor for electromagnetic signals, wherein the signal line is also provided with tensioning means extending substantially parallel to the signal line, wherein the conductor is positioned by the tensioning means. The invention also relates to a fence into which such a signal line is integrated. The invention further also relates to a method for manufacturing a fence provided with a signal line comprising a conductor for electromagnetic signals.
